

Why Are We Conducting This Study?

This study will evaluate the feasibility of developing a new corridor between SR 33 (Lakeland Hills Boulevard) and Walt Williams Road. This potential new connection will serve residential areas north of Interstate 4 (I-4). Our analysis is focused between the Socrum Loop Road interchange (exit 33) to the west and the SR 33 interchange (exit 38) to the east in the City of Lakeland, Polk County, Florida.

Primary Needs

- Provide an alternative to constrained corridors

Secondary Needs

- Accommodate Increasing Traffic
- Improve Safety
