

Please consider the following as you compare and rank the alternatives...

- Will there be enough shade present to keep you comfortable?
- What kinds of natural surroundings (water, wildlife, etc.) will the alignment route include?
- How comfortable would you be on the alignment route during normal traffic conditions?
- Will the alignment route be easily visible to passersby?
- How easily could you reach important destinations like transit facilities, parks, or businesses?
- Will the alignment route provide users enough separation from homes?
