**About**

The Florida Department of Transportation (FDOT) is conducting a Project Development and Environment (PD&E) Study for I-75 at Moccasin Wallow Road in Manatee County to evaluate modification of the existing interchange and construction of a braided ramp between I-275 and Moccasin Wallow interchanges.

The existing I-75 at I-275 and Moccasin Wallow interchanges are located at Mile Posts 229 and 230, respectively. The proposed improvements will improve mobility and accommodate travel demand generated by approved development in the project area.
