Shared Use Path study begins

The Florida Department of Transportation (FDOT), District One, has begun a Feasibility Study for a proposed shared use path along Pine Island Road in Lee County. This potential future path would add approximately five miles of pathway from Stringfellow Road, through Matlacha, to Veterans Memorial Parkway in Cape Coral. The goal of this study is to develop feasible alternatives to be evaluated in a future Project Development and Environment (PD&E) Phase.

The purpose of this project is to determine the feasibility of constructing a safe, viable, non-motorized travel option for commuters and recreational users of Pine Island Road, while minimizing effects to the natural, cultural, social, and physical environment. **Please complete the enclosed questionnaire or use the link on the project website to provide your input to FDOT. The questionnaire is open until Friday, July 16, 2021.**

Within the study limits, Pine Island Road has no dedicated bicycle facilities and intermittent pedestrian facilities. This future shared use path would connect to the existing path network and provide a connection between Pine Island, Matlacha, and Cape Coral.

Visit the project website for updates and announcements throughout the project. For any questions or comments, submit them through the 'Contact Us' page on the website or email FDOT Project Manager Steven A. Andrews (see the box to the left).
