Project Information

The Florida Department of Transportation (FDOT), District One, invites you to a Design Public Meeting to inform you of design change improvements on State Road (SR) 70 from County Road (CR) 29 to Lonesome Island Road, in Highlands County. A Project Development & Environment (PD&E) Study was completed in June 2025. The PD&E Study found this segment of SR 70 experiences roadway deficiencies, operational conditions issues, safety concerns, does not support economic development in the region, and does not provide system linkage to the area wide transportation network. An alternative that widens SR 70 to 4-lanes was chosen as the Preferred Alternative to address these items. The project has now moved forward to the next phase, final design. Design changes that will be presented at this meeting include alterations to access management and stormwater ponds.

Design Public Meeting

The purpose of this meeting is to inform the public of design changes and provide an opportunity for the public to ask questions and provide comments. There will be an in-person meeting on August 21, 2025, and a self-guided virtual meeting room available from August 21, 2025 - September 5, 2025. You can choose the meeting format that is most convenient for you. Materials displayed for the in-person and virtual meeting room will be the same. The same material will also be available on the project website.
