

Welcome to the

I-75 AT DANIELS PARKWAY INTERCHANGE

Public Outreach Meeting

JUNE 27, 2024

I-75 AT DANIELS PARKWAY INTERCHANGE

PROJECT LOCATION

Project: I-75 at Daniels Parkway Interchange
Limits: From East of Danport Boulevard to West of Treeline Avenue
FPID No.: 446296-2

I-75 AT DANIELS PARKWAY INTERCHANGE

CONCEPT DESIGN – DIVERGING DIAMOND INTERCHANGE

I-75 AT DANIELS PARKWAY INTERCHANGE

CONCEPT DESIGN – TYPICAL SECTION

Splintered Typical Section- Daniels Parkway Looking East

Typical Section- Daniels Parkway Looking East

DIVERGING DIAMOND INTERCHANGE (DDI) BENEFITS

A diverging diamond interchange (DDI) allows free flowing turns when entering and exiting an interstate, eliminating the left turn against oncoming traffic and limiting the number of traffic signal phases.

Other benefits of a DDI include:

- The use of two sets of traffic signals with short cycle lengths reduces traffic delays
- Can accommodate all vehicles (i.e., buses, trucks, cars, cyclists, etc.)
- Promotes efficient movement
- Reduce costs benefits by removing the need for extra lanes, turns lanes, etc.
- Can handle significantly more traffic volume
- Greatly reduces conflict points (14 vs. 26)
