

# TAMIAMI TRAIL (US 41) Vision Study

## FROM WILLIAM ST TO PEACE RIVER BRIDGE

Charlotte County, Florida  
FPID: 441524-1-32-01

The Florida Department of Transportation (FDOT), District One, in partnership with local governments, is conducting a study of the northbound, three-lane, one-way section of Tamiami Trail (US 41) from William Street to the Peace River Bridge in Downtown Punta Gorda, Charlotte County, FL in order to enhance an existing resurfacing project by focusing on safety for all corridor users (motorists, pedestrians, and bicyclists). The study will also promote the City of Punta Gorda's goals of walkability and strategic investment within Downtown.

**The FDOT needs your feedback to help identify the top priorities for the corridor and potential safety improvements.** The FDOT will conduct extensive public outreach throughout the duration of this study to help determine the best options to consider in order to maximize the results and value of the resurfacing project.

Please complete the questionnaire on the study website (see link below) to provide your input. All completed questionnaires must be received by June 18, 2021 to become part of the official study record.

You may also submit comments or questions at any time during the study through the 'Email Updates' page on the website. Please continue to visit the website for updated study information, documents, and announcements. If you have any questions or would like to schedule a meeting with the FDOT, please contact the FDOT Project Manager, Richard (OJ) Oujevolk, P.E. (see contact information below).
